

DIS SELECT

NUCLEAR LAB SOLUTIONS

Driving quality and efficiency in nuclear cardiology.

DIS SELECT

NUCLEAR LAB SOLUTIONS

Running a nuclear lab can be complicated and costly. A customized DIS Select Nuclear Lab package provides everything you need to offer complete nuclear medicine services at your office, satellite clinic, or other healthcare facility.

HOW IT WORKS

- ✓ DIS can assist with all aspects of your nuclear lab while providing your patients with a seamless experience and lowering your cost per study.
- ✓ You only pay for what you need!
- ✓ Leveraging our size and experience, DIS will build a custom package designed specifically for your practice.
- ✓ Packages can include any combination of staff, equipment, maintenance, licensing, accreditation, and supplies.

Increase the efficiency and profitability of your nuclear lab. Guaranteed.

DIS Select gives nuclear imaging providers the ability to add imaging equipment, staff, radiopharmaceuticals, maintenance, and accreditation from a nationwide, proven provider with no long term financial commitment.

Custom nuclear lab packages provide:

- Increased revenue
- Higher efficiency
- Decreased overhead costs
- Greater patient satisfaction and retention
- Access to the latest technology

Our customized solutions are effective and the benefits are significant. Utilizing DIS allows for greater patient convenience, higher patient satisfaction, and increased growth potential.

DIS Select provides everything you need to operate and manage your nuclear lab.

DIS packages are custom designed for your specific needs and your initial selections can be modified based on patient volume or changes with practice.

Individual Services Include:

STAFF

The DIS team is comprised of highly skilled, trained and certified nuclear medicine technologists and CSTs.

EQUIPMENT

The DIS lineup of cardiac imaging cameras includes fixed site and mobile systems delivered to your practice.

MAINTENANCE

DIS maintenance plans support service and repair of all major brands of nuclear gamma cameras.

LICENSING

With DIS Select, your office can leverage our portfolio of existing licenses and certifications.

ACCREDITATION

With experts at all stages, DIS can help you navigate the accreditation process.

SUPPLIES

DIS provides a wide range of nuclear imaging supplies and radiopharmaceuticals.

COST FACTORS

Your cost per study is driven by six key factors. DIS has expertise in managing and leveraging each of the six primary cost factors of running a nuclear lab.

LOW-DOSE

All of the systems DIS provides are either dual or triple-head, with specialized acquisition and processing software which supports all of today's advanced protocols and meets ASNC's Low Dose guidelines and fast imaging.

Build your own DIS Select package

Use the chart below to customize a package for your practice.
DIS can provide as much, or as little, support as you need.
